

Assignment 1 – Logo Redesign

Design Overview

The Swaragh Technologies logo was redesigned to create a modern and professional brand identity while maintaining the company's core values of innovation, trust, and growth. The refreshed logo combines a clean wordmark with a custom icon to improve brand recognition and visual consistency across digital platforms.

Design Process

- Studied the existing brand identity and company values.
- Explored multiple logo concepts through research and sketching.
- Designed a custom icon representing technology and connectivity.
- Chose a modern typography and corporate color palette.
- Refined the final logo in Adobe Illustrator for scalability and versatility.

Assignment 2 – Social Media Creative

Design Overview

The social media creative was designed to promote Swaragh Technologies' services with a clean, engaging, and professional visual style. The layout focuses on highlighting the company's expertise while maintaining strong brand consistency.

Design Process

- Identified the primary message and target audience.

- Created a clean layout with clear visual hierarchy.
- Used brand colors, icons, and typography for consistency.
- Balanced imagery and content to maximize engagement.
- Designed the creative in Adobe Photoshop for Facebook and Instagram.

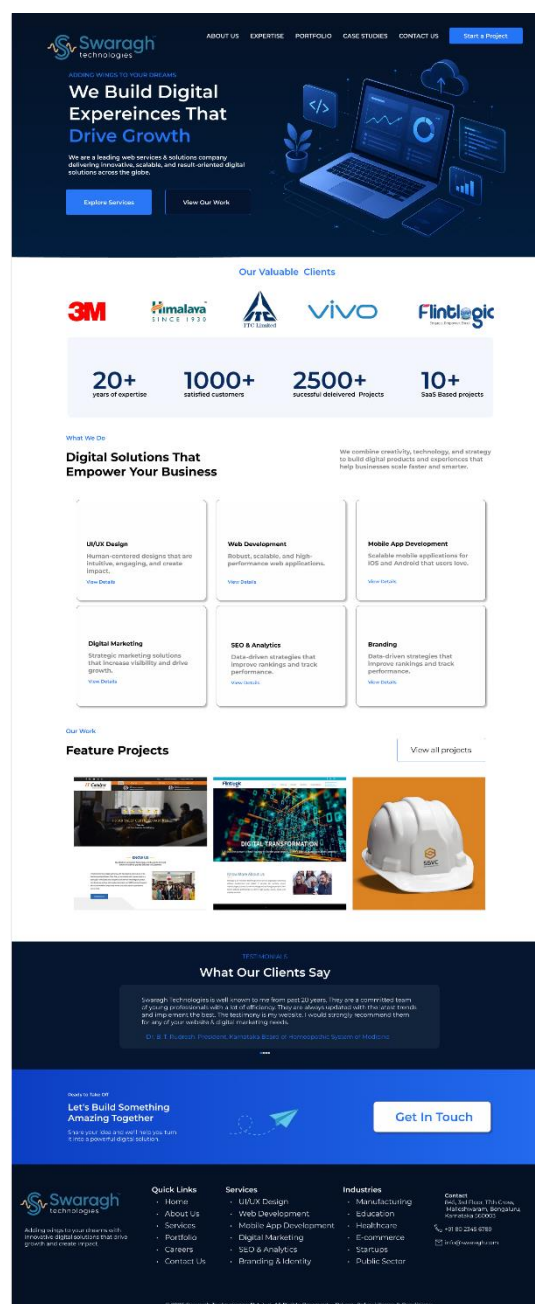

Assignment 3 – Homepage UI Design

Design Overview

The homepage was redesigned using a modern and minimal design approach to enhance usability, improve navigation, and establish a stronger digital presence. The interface focuses on delivering a professional user experience while effectively showcasing the company's services and achievements.

Design Process

- Analyzed the existing website to identify usability improvements.
- Planned the page structure with a clear information hierarchy.
- Designed responsive sections including Hero, Services, Clients, Portfolio, Testimonials, and Footer.
- Applied consistent typography, spacing, and color styles throughout the interface.
- Developed the complete UI in Figma with a focus on accessibility and user experience.

Closing Note

Thank you for taking the time to review my assignment. This project allowed me to showcase my creativity, problem-solving approach, and UI/UX design skills. I appreciate the opportunity and look forward to discussing my work further.

Regards,
Chandru Duraikannan
