RENTIFY – Product Rental Application

Project Overview

RENTIFY is a modern product rental application designed to help users rent premium products easily and affordably. The platform allows customers to browse, select and rent products such as cameras, laptops, bikes, furniture and home appliances for flexible durations including daily, weekly and monthly plans.

The application focuses on providing a smooth and user-friendly experience with a clean and modern interface. Users can explore products, view detailed information, choose rental plans and complete secure payments through a simplified checkout process.

The project also includes a responsive admin dashboard that helps administrators manage products, monitor orders, track revenue and handle customer activities efficiently.

Key Features

- User Login & Signup
 - Product Browsing & Categories
 - Product Detail Pages
 - Flexible Rental Plans
 - Secure Checkout System
 - Order Management
 - Admin Dashboard
 - Revenue & Analytics Tracking
 - Modern Minimal UI Design
-

Design Approach

The UI/UX design follows a clean and minimal design approach using bold typography, spacious layouts and modern color palettes. The visual identity mainly uses red, white black and premium accent colors to create a strong and professional brand appearance.

The application was designed with a focus on:

- Simplicity
 - Accessibility
 - Smooth navigation
 - Visual consistency
 - Premium user experience
-

Tools Used

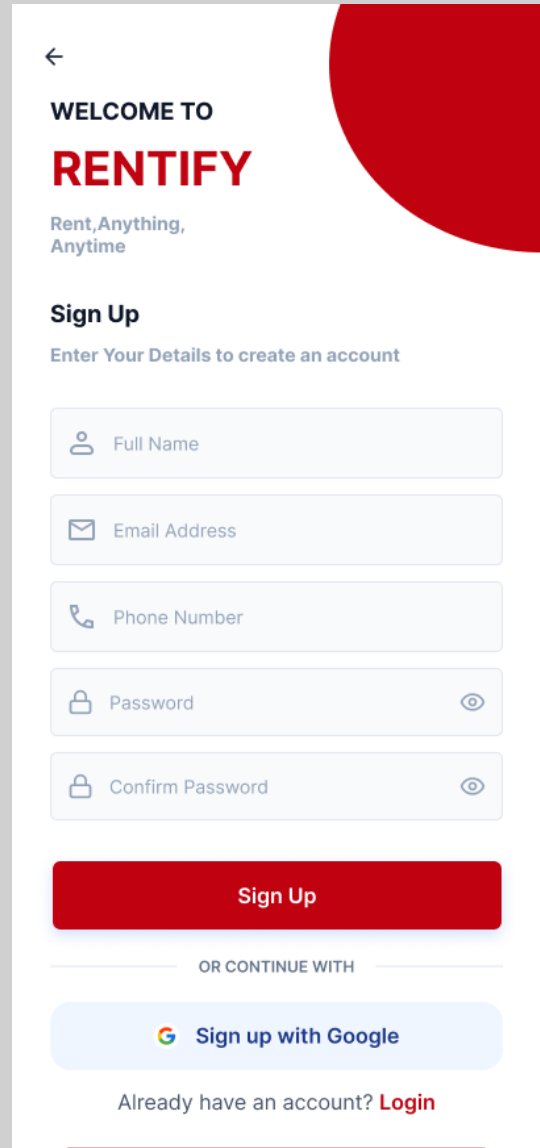

- Figma
 - Adobe Photoshop
-

Conclusion

RENTIFY provides a smart and convenient rental experience for users who want access to premium products without purchasing them. The project combines modern UI/UX principles with practical functionality to create an efficient and visually appealing rental platform.
